

The Department of Education and Early Childhood Development has provided all schools in Nova Scotia with a Student Success Survey for Grades 4-12 students. This survey will provide schools with important information regarding students' experiences. This information will help each school better plan improvements to enhance student learning and overall success.

Even though the survey focuses on the importance of student voice in reflecting on their school experience, students are allowed to skip any question that makes them uncomfortable. Student answers will only be used as part of a group, that will not in any way identify individual students.

Schools are to complete the survey by May 10th with the information being provided back to the school by end of June.
